

FOR TRADERS WHO KNOW THE THEORY — AND STILL LOSE

You already know what a breakout is. So why are you still losing?

Because knowing a pattern and **executing** it under live pressure are two completely different skills — and nobody ever trained the second one. This free masterclass closes the gap between what you know and what you can actually do. No tips. No signals. Just execution.

Taught by Aditya Khanna, NISM-Certified RA · 4,200+ traders trained
· No buy/sell calls

02 — AN HONEST DIAGNOSIS

Let's be honest about your situation.

You've watched the *videos*. You can name the candlestick patterns. You know what support and resistance *are*. On a chart from last week, you can point to exactly where you "should" have entered and exited.

And yet — in real time, with real money, your heart pounding:

You enter late

You move your stop

You hold losers, cut winners

You revenge-trade a red day

This isn't a knowledge gap. It's an execution gap.

And free YouTube videos, by design, can never close it — because watching is not the same as doing, and information is not the same as skill.

03 — THE REFRAME

Trading is a performance skill — not a knowledge subject.

It's more like learning to drive than learning history. You didn't become a driver by watching driving videos — you became one through supervised, repeated practice, until the right actions became automatic.

HOW TRADING IS USUALLY TAUGHT

Like learning history

Watch, memorise, repeat the words back. All *what*, almost no *how*. You finish informed — and still can't perform.

HOW WE TEACH IT

Like learning to drive

Built entirely around execution, repetition, review, and the psychology of doing the right thing when it's hard.

That's the whole problem with how trading is taught in India — and it's exactly what this program inverts.

THE METHODOLOGY · 5 STAGES

The AK Execution Loop

A continuous cycle that repeats and compounds. Concepts are step one of five — the other four are where the skill is actually built.

01 Knowledge

The concept, taught properly — with real historical examples, not hype.

02 Practice

Rehearse it in a no-risk setting until the right action feels familiar.

03 Implementation

Execute the process live, to strict rules you wrote down in advance.

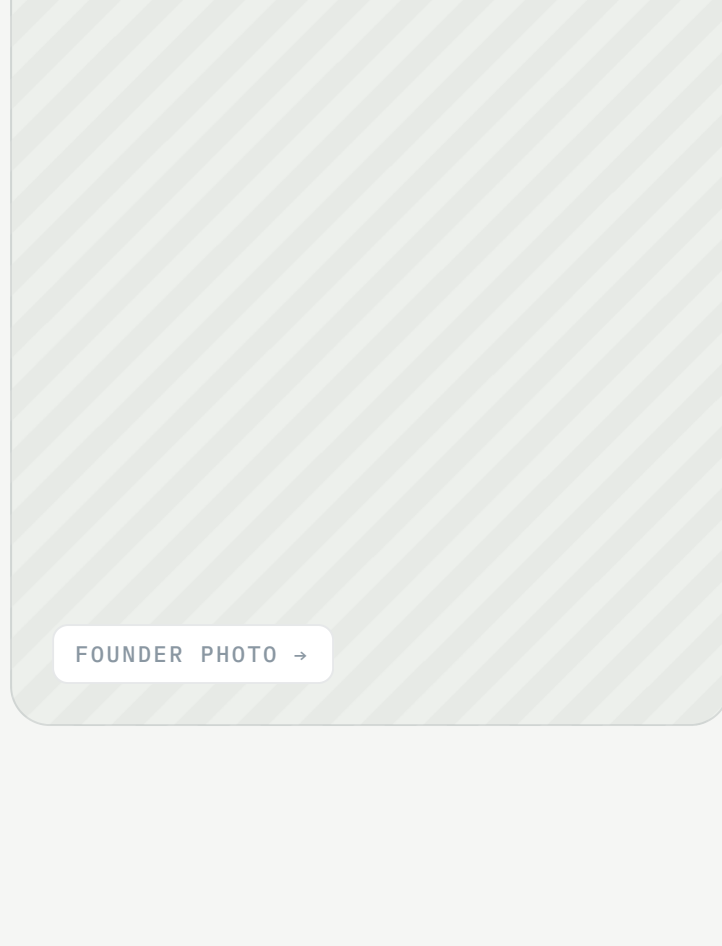

04 Analyse & Improve

Journal every decision and find the one leak costing you the most.

05 Control

Build the emotional discipline to follow your own rules under pressure.

"Most courses stop at step one. The other four — where skill is actually built — are the whole point of this one."

WHO'S TEACHING

"I understood the market for years before I could actually trade it. That gap is exactly why I built this."

I'm Aditya Khanna. For years I could explain every setup on a chart and still freeze when it mattered. What finally changed my trading wasn't a new indicator — it was training the *doing*: deliberate practice, ruthless review, and the discipline to follow my own plan.

The AK Execution Loop is the system I wish someone had handed me on day one — built to close that gap for the trader I used to be.

Aditya Khanna · NISM-Certified Research Analyst · Reg. INH00000000

WHAT CHANGED FOR THEM

Execution shifts, in their words.

"I knew all the theory for two years. What I didn't have was the discipline to follow it. This is the first time someone trained the *doing*, not just the knowing. I finally execute my plan instead of freezing."

Sandeep K.
VERIFIED LEARNER · TRADING 3 YRS

"I stopped moving my stop-loss. Sounds small. It changed my entire month — and the way I show up to every single trade."

Anita R.
VERIFIED LEARNER · TRADING 2 YRS

These reflect individual learning experiences with the program's process and discipline — not financial returns or earnings. Trading involves substantial risk; most traders lose money. No specific outcome is implied or promised.

INSIDE THE MASTERCLASS

Seven sessions, built around execution.

Every session turns something you "know" into something you can repeatably do — the Loop, in practice.

01

Why knowledge isn't enough

The execution gap, explained — and why free content can't close it.

02

The pre-trade checklist

Turning "knowing" into a single repeatable action you run every time.

03

Executing entries & exits

Rules that remove hesitation, so you act instead of second-guessing.

04

Risk & sizing in real time

Position sizing as an action you take — not a theory you nod along to.

05

The discipline systems

How pros do the right thing under pressure — by design, not willpower.

06

Journaling for skill

Analyse → improve → repeat. The Loop, running on your own trades.

07

Supervised, observed practice

Closing the loop together — educational and observed. No calls, no recommendations.

THE BONUS STACK — INCLUDED FREE

Everything you need to run the Loop yourself.

The Pre-Trade Checklist (printable)

The Trading Journal, built for the Loop

The 1-Page Plan template

Lifetime access to recordings

A private practice-and-accountability community

STRAIGHT ANSWERS

Questions, answered plainly.

I already know a lot of theory — is this too basic for me?	+
If you know the theory but still lose, this is built for exactly you. We start where the videos stop: execution.	
Will you give signals or buy/sell calls?	+
How is this different from free YouTube?	+
Do you guarantee profits?	+

7 DAYS

A 7-day, no-questions-asked refund.

If this isn't the most execution-focused, least theory-padded trading education you've taken, ask within seven days and get every rupee back.

THE NEXT COHORT

You don't need more information. You need to close the gap.

The next free masterclass starts **Monday, 13 July**. Seats are limited to keep the practice supervised.
